

Online business solutions

Business to Consumer e commerce:

Rentworks

Rentworks is a commercial and consumer lease and finance broker. Until now, the bulk of its transactions were paper-based. **ResearchPlus** has developed a cutting-edge e-business solution for them, which will re-shape the way they do business in the future.

The solution developed allows **Rentworks** to process on line applications from individuals, companies and government departments for equipment up to a value of several hundred thousand dollars. It allows for quotes to be formulated, applications to be made based on these quotes and the creditworthiness of applicants to be checked. It lends itself to a variety of leasing contexts.

The solution features two innovations:

- a direct link to the CRAA (Credit Reference Association of Australia), which allows for an immediate credit check (on the potential customer) (**ResearchPlus** is only the second company in Australia to have implemented this link).
- dynamic creation of Adobe Acrobat documents for all the application and leasing requirements.

Global implementation of this integrated database solution is envisaged.
